TITLE/SIGNIFICANCE:

Chinese Deployment of a "Mixed-AAA" Battery

COMMENT: The Chinese are deploying a "mixed-AAA" battery with their armored units. This battery consists of four 37mm AA guns and two ZPU-4. It appears that the Chinese are deploying one "mixed-AAA" battery per armored regiment. The identification of this battery will assist in differentiating armored regiments subordinate to an armored division from T/AG regiments subordinate to an infantry division. Armor regiments with the "mixed-AAA" battery have been identified in the Shenyang, Lanchou, Peiching, Wuhan and Chinan Military Regions.
